Welcome to the *2018 GuideStar Nonprofit Compensation Report*. This year's report, the 18th in our annual series, is derived from information on more than 159,000 individual positions at more than 112,000 tax-exempt organizations. The executive summary presents findings based not only on this report but also on data for previous years.

The *GuideStar Nonprofit Compensation Report* remains the only large-scale analysis of its kind based entirely on data reported to the IRS. It also continues to be the most comprehensive nonprofit compensation study available.

Accurate, complete, and authoritative information on the nonprofit sector is more important than ever. The Pension Protection Act of 2006 increased the penalties for excessive benefit transactions, including overpayment of nonprofit executives. Meanwhile, Congress, donors, and the media continue to scrutinize nonprofit salaries.

Nonprofits must demonstrate to oversight agencies, grantmakers of all types (government, corporations, and private foundations), and individual donors that the salaries and benefits they offer are justified. They must document their compensation practices and be prepared to help their supporters understand why these practices are appropriate. The *GuideStar Nonprofit Compensation Report* is a valuable tool for achieving these goals.

This volume was conceived, designed, and compiled for 17 years by Chuck McLean, GuideStar's senior research fellow. It was his "baby," and in this past year he entrusted it to me. Without Chuck's solid documentation and guidance at various stages of the process this summer, the 18th edition would not be in your hands. It has been humbling to learn how he put it together, never mind the whys and wherefores of certain decisions he had to make regarding the coding of the data. And, although I have tried to replicate all of the steps in this transitional year, like every year there were places where decisions needed to be made. For good or bad, I made those decisions. I would also like to take time to acknowledge and thank Carol Brouwer, who groomed and pulled the initial data set for this report and served as a sage sounding board for me as the work progressed.

In the year ahead, with a deeper understanding of the data and the report, I will be laying out plans for the 2019 edition. Feedback and comments on changes made this year, which are outlined in the executive summary, or any other aspects of the report are very much welcome. Please e-mail your thoughts to [holly.ivel@guidestar.org](mailto:holly.ivel@guidestar.org).

Thank you for acquiring the *2018 GuideStar Nonprofit Compensation Report*.

# Highlights of the 2018 GuideStar Nonprofit Compensation Report

## Executive Summary

The 2018 GuideStar Nonprofit Compensation Report is based on 159,114 observations from 112,609 Forms 990 and 990-EZ filed by 501(c) organizations with the IRS for fiscal year 2016. Among the highlights:

### More observations in the \$250,000 or less budget band

- Over several years, lack of resources prevented GuideStar from keying Form 990-EZ data. GuideStar returned to keying Form 990-EZ data in the past year, allowing us to include compensation data from those filings wherever they met our criteria. Of the 159,114 observations in this year's report, 9,788 came from EZ filings. This figure represents a 24 percent boost in the number of filings for organizations in the \$250,000 or less band.

### Section 501(c)(3) organizations broken out from other nonprofits

- Historically, the majority of organizations in the *Compensation Report* were grouped by NTEE codes (National Taxonomy of Exempt Entities codes, which classify nonprofits by mission). Section 501(c)(3) charitable organizations were most likely to have NTEE codes. Organizations that didn't have an NTEE code were grouped in the report according to their IRS subsection codes. In recent years, however, more nonprofit organizations received NTEE code assignments, resulting in the inclusion of more non-(c)(3)s in the NTEE code groupings and fewer in the breakout of other subsection codes.
- In response to requests for a return to greater visibility into non-501(c)(3) nonprofits, we have created separate sections at the national, state, and MSA (metropolitan statistical area) levels. Data for 501(c)(3) organizations are grouped by NTEE code. Data for non-(c)(3)s is presented in sections titled, "Other Subsection Groups."
  - Non-501(c)(3)s account for 22,088 filings, or 19 percent of total filings.
  - The largest number of filings for Other Subsections are under 501(c)(4) civic leagues, social welfare organizations, and location associations of employees; 501(c)(6) business leagues, chambers of commerce, real estate boards, etc.; 501(c)(7) social and recreational clubs; and 501(c)(14) state chartered credit unions and mutual reserve funds. Section 501(c)(6) business leagues account for almost 48 percent of non-(c)(3)s in the report.

### Modest increases in compensation in most budget bands

- Median compensation increased modestly in 2016 compared to 2015 in all but the bottom and top budget bands.
- We believe the negative trends in the lowest budget bands result in part from the 36 percent increase in the number of observations in this category, a result of the inclusion of more Form 990-EZ filings in the analysis.
- The highest budget band show a significant year-over-year increase, 4.9 percent for women and 8.4 percent for men.

### **Continued narrowing of the gender gap**

- Median compensation of females continued to lag behind that of males when considering comparable positions at similar organizations. The gap ranged from 4 percent for CEOs at organizations with budgets of \$250 thousand or less to 20 percent at organizations with budgets of greater than \$50 million.
- Although the gap persists, all budget bands showed a decline in the size of the gap from 2015 to 2016, with the size of the gap at mid-sized nonprofits showing the greatest reduction.
- Year-over-year median compensation changes are positive and higher for females than males in all but the top two budget bands, in which that trend is reversed.

### **Leadership by Gender**

- Since 2005, women have made gains in the percentage of CEOs in organizations of all sizes. Gains have been most dramatic at organizations with budgets between \$25 million and \$50 million, where female leadership increased from 20 percent to 30 percent.
- Between 2015 and 2016, however, we saw virtually no change in the percentage of women leading organizations in any budget category.

### **Incumbent Compensation**

- The median percentage increases in 2016 were either in line with or slightly lower than the median percentage increases in 2015.
- The highest pay increases—3 to 4 percent—continued to be seen in organizations with budgets of \$2.5 million and up.
- Women showed higher median percent increases than men in all budget bands except the highest two, which is in line with what we saw in the pay gap analysis.

### **Trends by Program Area for 501(c)(3) Organizations**

- As was the case last year and has been for some time, health and science organizations had the highest overall median salaries. Arts, religion, and animal-related organizations brought up the rear.

### **Trends by Role**

- Dedicated HR and IT leadership roles or roles with explicit HR or IT responsibilities appear to emerge as organizations get larger.
- The number of these job observations doubles between the \$1 million-\$2.5 million band and the \$2.5 million-\$5 million band. That number doubles again between the \$5 million-\$10 million band and again between \$5 million-\$10 million and \$10 million and \$25 million.

Several of these topics are explored in more detail below.

## Compensation by Gender

As past reports have found, there are still significant differences between the compensation of males and females. The median compensation of female CEOs was lower than that of males at organizations of all sizes, ranging from a 4 percent difference at organizations with budgets of less than \$250 thousand to 20 percent at organizations with budgets over \$50 million.

The pay gap between males and females appears to be *slowly* declining in all but the largest nonprofits.

- The gap is smallest at organizations with budgets of less than \$500 thousand.
- Mid-sized organizations with budgets between \$2.5 million and \$25 million show a larger decline in the size of the gap between pay for men and women in the last year.
- The pay gaps show no clear trend of abating at the largest organizations.

**Female Gap in Median CEO Compensation  
2005-2016**

Budget Size	2005	2015	2016
<\$250 thousand	22%	7%	4%
\$250 thousand-\$500 thousand	18%	12%	10%
\$500 thousand-\$1 million	17%	14%	12%
\$1 million-\$2.5 million	19%	15%	14%
<b>\$2.5 million-\$5 million</b>	<b>19%</b>	<b>18%</b>	<b>14%</b>
<b>\$5 million-\$10 million</b>	<b>21%</b>	<b>19%</b>	<b>15%</b>
<b>\$10 million-\$25 million</b>	<b>20%</b>	<b>21%</b>	<b>17%</b>
\$25 million-\$50 million	17%	17%	16%
>\$50 million	25%	21%	20%

The chart below shows the annualized change in CEO median salary from 2015 to 2016.

- Compensation in the lowest budget band of \$250 thousand or less appears to have gone down. We think this is largely driven by the 36 percent increase in the number of observations available this year because of the inclusion of more 990-EZ filings. For 2015 we had 13,587 observations in this band, compared to 18,491 observations for 2016.
- Other budget bands show more modest gains year over year, with female median salary increases being stronger until the top two budget bands, in which that trend is reversed.
- The highest budget band shows significant jumps in median salary year over year.

**Annualized Change in CEO Median Salary  
2015-2016**

Budget Size	Female	Male
\$250 thousand or less	-4.3%	-6.2%
Between \$250 thousand and \$500 thousand	1.2%	0.6%
Between \$500 thousand and \$1 million	1.5%	0.2%
Between \$1 million and \$2.5 million	-0.1%	0.9%
Between \$2.5 million and \$5 million	3.2%	1.4%
Between \$5 million and \$10 million	1.6%	0.8%
Between \$10 million and \$25 million	2.6%	1.7%
Between \$25 million and \$50 million	1.9%	4.2%
Greater than \$50 million	4.9%	8.4%

### Leadership by Gender

In the 11 years from 2005 to 2016, the percentage of female CEOs grew in all budget groups. As has been the case in the past, however, their representation still declined steadily as organization size increased. Women still represent the majority of CEOs at smaller organizations. We saw virtually no change between 2015 and 2016 numbers.

**Percentage of Female CEOs, 2005-2016**

Budget Size	2005	2016
\$250 thousand or less	53%	57%
Between \$250 thousand and \$500 thousand	54%	56%
Between \$500 thousand and \$1 million	47%	54%
Between \$1 million and \$2.5 million	42%	49%
Between \$2.5 million and \$5 million	36%	44%
Between \$5 million and \$10 million	31%	38%
Between \$10 million and \$25 million	26%	34%
Between \$25 million and \$50 million	20%	30%
Greater than \$50 million	14%	22%

## Incumbent Compensation

The median increase in compensation of incumbent CEOs was either the same or slightly lower in 2016 than in 2015, regardless of gender or organization size.

- Although median increases are still lower than those observed before the recession of the last decade, 2016 was the second year since then in which we saw increases of 4 percent or more. As has typically been the case, increases were higher at larger organizations.
- In all but the highest two budget bands, females received higher increases than males. This finding aligns with the trend noted above regarding a decreasing gender gap in pay across all budget bands except the highest two.

**Median Increase in Incumbent CEO Compensation by Gender  
2015-2016**

Budget Size	Female	Male
\$250 thousand or less	1.3%	0.0%
Between \$250 thousand and \$500 thousand	2.5%	1.6%
Between \$500 thousand and \$1 million	2.8%	2.3%
Between \$1 million and \$2.5 million	2.9%	2.5%
Between \$2.5 million and \$5 million	3.1%	2.9%
Between \$5 million and \$10 million	3.3%	3.2%
Between \$10 million and \$25 million	3.9%	3.4%
Between \$25 million and \$50 million	4.3%	4.4%
Greater than \$50 million	4.0%	4.2%

## Trends by Program Area for 501(c)(3) Organizations

Not surprisingly, the type of work that tends to be associated with specialized knowledge and/or large organizations led the way in median compensation.

## Trends in HR and IT Roles by Budget Size

Dedicated HR and IT leadership roles or roles with explicit HR or IT responsibilities appear to emerge as organizations get larger.

## ***Compensation Report Overview and Methodology***

The *2018 GuideStar Nonprofit Compensation Report* draws exclusively from data reported on Forms 990 and 990-EZ. These are information returns filed annually with the Internal Revenue Service (IRS) by most tax-exempt organizations—the 990 is used by organizations with annual revenues of \$200,000 or more, and the 990-EZ by organizations with annual revenues of \$200,000 or less and EOY assets of less than \$500,000. Organizations are instructed to supply compensation information for all officers, directors, trustees, and up to 20 key employees who earn at least \$150,000. Additionally, information is provided for certain other employees who earn at least \$100,000.

The report considers 159,114 observations from 112,609 forms filed with the Internal Revenue Service by section 501(c) nonprofits for fiscal year 2016. Statistics are reported on total compensation; for the purposes of this report, total compensation is defined as the sum of Form 990, Part VII, Line 1a, Columns D, E, and F, or Form 990-EZ, Part IV, Columns C, D, and E, and Part VI, Columns C, D, and E. Individuals with total compensation of less than \$15,000 were not included in order to make the cleansing and processing of the data more manageable. The vast majority of the filings examined for this report, 94 percent, were 990s; only 6 percent were EZs.

The *2018 GuideStar Nonprofit Compensation Report* also reports statistics on annual increases in total compensation. Because these statistics are driven by direct comparison with 2015 data for individuals who held the same positions at the same organizations, this data is less rich. It includes 91,377 observations from 69,520 organizations.

### **Job Categories**

The report shows the following job categories broken down by various combinations of gender, geography, organization type, and organization size. Because of the way organizations are required to report compensation on Form 990, only one position is available for most organizations, that of CEO/Executive Director. The report is extremely robust in that area, less so in the others. The chart below lists the number of individuals in the report who were classified into each job category and provides a few examples of the types of job titles mapped to each one.

The machine coding of the information into these job categories was relatively straightforward after extensive data cleansing, except in the case of CEO/Executive Director. Heads of organizations might be called President, CEO, Administrator, or some other title. When someone with such a title was the most highly compensated person reported on an organization's return, the default coding was into the

CEO/Executive Director category. In other cases, more care had to be taken. For example, physicians and football coaches frequently make more money than the heads of their organizations.

In the tables where the data is split out by gender, gender has been assigned using a third-party software program.

### Output Display

For each combination of variables with at least 5 observations, information is displayed. When there are fewer than 10 observations, only the average and median values are displayed. For between 10 and 20 observations, we display the average and the 25th, median (50th percentile), and 75th percentiles. For more than 20 observations, the 10th and 90th percentiles are also displayed. These percentile values approximate the distribution of compensation within a given category. As an example, if the 25th percentile value is \$43,278, this means that about 25 percent of employees in the category made less than \$43,278 and about 75 percent made more than that.

In cases where there are few observations, the median is likely to be the most reliable statistic. Still, this report does not use sampling but draws instead from every fiscal year 2016 Form 990 available to the author on August 1, 2018, on which compensation information was reported and could be codified. In most categories where the number of observations is small, it is because the number of such organizations in the entire population is as small or almost as small.

In general, the report is not useful for comparisons across categories, especially when the number of observations is small. For example, in the \$250,000 to \$500,000 budget group, the median salary for the top legal position is \$77,400, versus \$61,736 for CEOs. The CEO median, however, is based on 15,380 organizations, whereas that for the top legal position is based on only 18 organizations, and the CEO is more highly compensated (or is also in the top legal position) in 11 of those 18.

Besides job category, results are displayed for various combinations of gender, organization size, geography, and organization type. As noted above, gender was determined using a third-party software program.

### **Organization Budget Size**

Organization size is represented here by annual expenses. Two different groupings are used, depending on the amount of information available for a particular table:

- Four groups: \$500,000 or less; \$500,001 to \$1,000,000; \$1,000,001 to \$5,000,000; and greater than \$5,000,000
- Nine groups: \$250,000 or less; \$250,001 to \$500,000; \$500,001 to \$1,000,000; \$1,000,001 to \$2,500,000; \$2,500,001 to \$5,000,000; \$5,000,001 to \$10,000,000; \$10,000,001 to \$25,000,000; \$25,000,001 to \$50,000,000; and greater than \$50,000,000

### **Geography**

Two different geographical groupings are used: state (including Puerto Rico), and metropolitan statistical area.

#### **Metropolitan Statistical Area (MSA)**

Data is displayed only for MSAs for which sufficient data is available, a total of 337. The level of detail available varies greatly, with larger MSAs obviously having more information available than smaller ones. The following MSAs have 500 or more observations:

## Organization Type

There are two primary organization type groupings in this report, (a) 501(c)(3) organizations and (b) other subsections.

Section 501(c)(3) organizations are classified using the National Taxonomy of Exempt Entities (NTEE), a hierarchical system developed by the National Center for Charitable Statistics (NCCS) and used to group nonprofit organizations. Some 90,521 filings fall into this category.

The report uses three levels of hierarchy for 501(c)(3)s: NTEE major group (general), NTEE decile group (more specific), and NTEE centile group (most specific). For example, the Museum of Modern Art belongs to the NTEE major group “Arts, Culture, and Humanities”; the NTEE decile group “Museum, Museum Activities”; and the NTEE centile group “Art Museums.” More information

about the NTEE system, including definitions, is available at the NCCS website (<http://nccs.urban.org/classification/NTEE.cfm>).  
Note: N.E.C. below means “not elsewhere classified.”

A full list of the major, decile, and centile NTEE codes used in this report can be found in Appendix B.

Nonprofit organizations that fall outside the 501(c)(3) category are listed by their IRS subsections in the “Other Subsections” portions of the report. Of the 112,609 filings in this report, 22,088 fall into this category. Five subsections make up the majority of the non-(c)(3) filings:

IRS Subsection	Filing Count
501(c)(6)—Business Leagues, Chambers of Commerce	10,535
501(c)(5)—Labor, Agriculture, and Horticultural Organizations	4,485
501(c)(14)—State Chartered Credit Unions	1,689
501(c)(4)—Civil Leagues, Social Welfare Organizations	1,656
501(c)(7)—Social and Recreational Clubs	1,621
